## TECHNICAL SKILLS

- Languages**  
Python, C, C++, Java, Go (Basics), C#, SQL
- Tools & Infrastructure**  
Git, Docker, REST APIs, GCP, Firebase, CI/CD Concepts
- Platforms & OS**  
Linux/Unix (Intermediate), Windows, macOS
- Practices**  
Object-Oriented Design, Agile processes, System Design, Secure Coding Practices

## CERTIFICATIONS

- Network Admin Cert (Level 6) – IDF, 2022
- Instructor Diploma – Ministry of Education, 2024

Highly motivated **Computer Science student** (Expected Graduation: **June 2026**) at The Academic College of Tel-Aviv-Yaffo. Passionate about **system architecture, high-performance software, and cybersecurity**. Proficient in **Python, C/C++, and Java**. Seeking an Engineering Intern role to solve complex technical problems, contribute to massively scalable distributed architectures, and help build mission-driven, native security solutions.

## EDUCATION

- B.Sc. Computer Science** Oct 2023 – Expected Jun 2026  
**The Academic College of Tel-Aviv-Yaffo** Tel-Aviv-Yaffo  
Relevant Coursework: **Operating Systems, Data Structures, Algorithms, Computer Networks, Advanced Programming in C, Object-Oriented Programming (C++)**.  
AMIRAM English Exemption: **133/150**.

## FEATURED PROJECTS

- AI-Powered Educational Backend Platform** 2025 – Present  
Engineered a scalable platform that automates the retrieval, transcription, and processing of university lectures. Built a distributed architecture using **FastAPI** to handle data pipelines, integrated with **AssemblyAI** for audio processing and **OpenAI** for intelligent summarization. Emphasized clean system design, secure data handling, and **RESTful API** implementation.  
Tech Stack: **Python, FastAPI, Docker, React, PostgreSQL/Database, Git**.

## EXPERIENCE

- Network Administrator** Aug 2021 – Aug 2022  
**IDF ICT Corps**  
Deployed, maintained, and secured **LAN/WAN infrastructure** for 100+ personnel. Monitored network traffic, resolved OS-level connectivity issues, and implemented strict access controls. **Reduced network downtime by 25%** and earned the Network Admin Cert (Level 6). (Service concluded for medical reasons).
- Programming & Robotics** 2024 – Present  
**Instructor**  
**Tactics Education**  
Teach **C programming and hardware integration (Arduino)**. Design project-based learning modules focusing on logic, memory management, and debugging fundamentals.

## OTHER PROJECTS

- Classic Game Console (Donkey Kong)**  
Developed a native game remake utilizing **C++**. Focused on low-level memory management, strict Object-Oriented principles, and high-performance rendering.
- Study Buddy Web App**  
Engineered a matching algorithm application connecting students. Utilized **React** for the client side and **Firebase** for authentication and real-time database management.
- + Actively exploring application security (AppSec) concepts and continuously contributing to independent open-source GitHub projects.
